We’re off to the start of another exciting new school year and we will soon start construction for the beautiful new auditorium at Beach High School! The new auditorium has been bid and work is scheduled to start in late August. The new addition will be built on a section of the parking lot facing Hopkins Street. Construction will limit parking in the lot and the entrance off Hopkins Street will be used for construction traffic only. Anyone who may need access to the side parking lot will enter from West 48th Street. The new building will provide an auditorium with 600 seats that includes a raised stage, lobby, scene shop, dressing rooms, and state of the art sound and lighting systems. The facility is being designed for both school and community use. Additional parking will also be available when the facility opens in August 2020.

The auditorium and social science buildings have been demolished to make room for the construction to begin on the new building that will be located behind the current school. Modular classrooms were installed this summer to house the classrooms lost in the demolition. Construction of a new parking lot off Timberline Drive has started along with excavation work and utilities.

The students at Jenkins will remain in the current building until construction is complete; however, all site based athletic programs will be relocated throughout the construction phase. The new school is expected to be ready for the start of school in August of 2021; with the demolition of the existing buildings, all the final site work and athletic fields completed by the end of that year.

Start of Construction!

Savannah-Chatham County Public School System

Tree clearing of the site for the new school is in progress. The award of contract is expected to take place in August and excavation work will start by the end of the month. The new school will have 93 classrooms and will accommodate 1,500 students. The building is scheduled to be complete for the beginning of the school year in August 2021.

The New Hampstead K-8 School will be located directly behind the existing New Hampstead High School. A walking path connecting the two schools will be included to create a campus-like atmosphere for the students, faculty, and the surrounding neighborhood.

Construction Progress!

Savannah-Chatham County Public School System

Construction continues with the work progressing on schedule. The concrete floors are being poured and masonry walls are being built. The schedule for the next four months will include structural building components, placing steel joists, decking, and roofing. The project is scheduled for completion at the start of the school year in August 2020.

The new building will accommodate 650 students and will include a full administrative suite, cafetorium with adjoining courtyard, gymnasium, state of the art library/learning commons, music and art rooms, special education rooms, and classrooms.

Construction is underway for the new Islands High Athletic Complex. Site work and construction of the fieldhouse have started. The project will consist of the construction of an artificial turf multipurpose field and a competition 8 lane track. The stadium bleachers are sized to accommodate 2,000 spectators.

The field house building will include home and visitor team rooms, concessions, and restrooms to serve the facility. The field will have LED lighting for evening events with a large vegetative buffer maintained along the south property line for privacy.

Design

Savannah-Chatham County Public School System

Design is in progress for the gym addition and renovations for a school auditorium. The addition is being designed so that the new gym (shown in yellow) can be constructed and put in use prior to demolishing the old gym interior, converting it to an auditorium, and building a new music suite (shown in blue). A drive that leads to the rear of the school and additional parking is also being planned.

The new gymnasium will seat 1,200 spectators and will include public bathrooms, concessions, locker rooms, team rooms, and a weight room. The auditorium will include a sloped floor design and will seat 480 guests. A new stage and music suite will also be included.

Design is scheduled for completion in September and the project will bid in October 2019. Construction will begin in late October with site work in preparation for the gymnasium addition.
